ADATAVIS TOURTOOLS®
ONLINE

Easily integrate on-line reservations and booking into your website. Increase sales and lower your operating costs by providing your clients easy, secure access to:

- ✔ Online tour schedules and itineraries
- ✔ Check for availability and pricing
- ✔ Make bookings with deposits
- ✔ Change passenger names
- ✔ Request changes or cancellations
- ✔ Request information or brochures

With Adatavis TourTools® Online you can create complex tour packages in minutes and then, with the click of a button, publish the tour to your website - **READY FOR BOOKING!**

Easily update your web pages with photos and maps and add/delete tours from your website. Control inventory, even last-seat sales, tour package prices, passenger lists and manifests, everything can be managed from your browser.

Group Tours
For operators working with pre-formed groups, unique group codes can be issued to group leaders and members so that only members of that group can access the group tour itinerary and packages. Group leaders can make the bookings for the members or members can log in and book themselves.

Group leaders also have special reports to monitor reservations for their departures, we have even included a quick email feature so that the leader can contact members of their group.
